PRESSURE COMPENSATED FLOW UNIDIRECTIONAL FLOW CONTROL VALVES - IN-LINE MOUNTING

The valve maintains the flow rate in one direction (A to A1) regardless of oil pressure; the oil flows freely in the opposite direction.

The flow is reduced by turning the wheel right or left.

Slight leakage is tolerated when the control screw or wheel is screwed down completely.

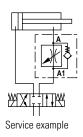

It has a galvanised steel body. The compensator plunger and check valve ball poppet are in tempered and ground steel.
